PROFESSIONAL SUMMARY

Computer Science student with hands-on experience building data analytics tools and full-stack web applications using Python, SQL, Power BI, Pandas, TypeScript, and Next.js. Combines technical project experience with a background in client relations and cross-functional coordination.

EXPERIENCE

Client Relations Manager

Jul 2023 – Nov 2023

Pixel Creative

Lalitpur

- Built and maintained onboarding checklists that reduced new client setup time and confusion across digital projects.
- Coordinated weekly status calls with creative and development teams to align project milestones and expectations.
- Designed a client satisfaction survey that gathered actionable feedback used to refine service offerings.

Marketing Head / Graphic Designer

Avant-Garde Literary Club

- Led design of event posters and social media graphics using Adobe Photoshop to support student events and engagement.
- Managed vendor prints and proofs for flyers and banners, reducing printer errors before events.
- Built and maintained an asset library in Google Drive, accelerating content retrieval for campaigns.
- Trained club volunteers on basic InDesign layout rules, improving consistency across promotional materials.

EDUCATION

Angelo State University

San Angelo, TX

B.S. in Computer Science. College of Science & Engineering.

Expected Fall 2028

Community College of Baltimore County

Associate of Science in Computer Science.

May 2026

Global College of Management

High School.

Kathmandu

Apr 2023

SKILLS

Programming: Python, SQL, TypeScript, Java

Data Analytics: Power BI, Pandas, Microsoft Excel, Data Cleaning, Data Visualization, Data Analysis

Databases: PostgreSQL, MySQL, Supabase

Web & Apps: Next.js, React, Streamlit

Tools: Git, GitHub, MySQL Workbench

Professional: Leadership, Critical Thinking, Adaptability

PROJECTS

Supermarket Sales Analysis

ai-supermarket-sales-analyst-jk4ek9qwbc5xw56urmydmp.streamlit.app

- Cleaned and analyzed a 1,000-transaction retail dataset using Excel and SQL to surface trends across sales, customer behavior, product lines, and profitability.
- Built SQL queries and Excel PivotTables to evaluate branch performance, payment methods, and time-period patterns.
- Developed an interactive Power BI dashboard with KPIs, slicers, and visualizations for sales, COGS, gross income, and product performance.
- Built a Streamlit-based analytics application that filters transaction data and calculates business metrics and profit targets.

MyJobTracker myjob-tracker.vercel.app

- Developed a full-stack job application tracking web application with a Kanban-style workflow for organizing applications by status.
- Built reusable React/TypeScript components for application management, statistics, filtering, and editing workflows.
- Integrated Supabase for PostgreSQL data storage and authentication, with GitHub used for version control.
